

Bringing the worlds best chillers to Australia

MODEL:
SGT2-BS

QUICK INFO

The Rhino upright glass door fridge range has been made especially with shallow depth of 515mm, to assist with installations that are tight for room. Not only does the unit boast brand name parts it also looks stunning with polished stainless steel interior and long bar handle on door.

The triple glazed LOW E glass ensures minimal condensation keeping your product visible to consumers. We also added 'electrically heated' area's to body of fridge where door meets as this is always prone to heavy condensation. A unique feature no one else does these days with cheaper units on market.
